Mentor Workshop important info:

This session is recorded—the session will be posted on YouTube later.

Raise your hand—use the Zoom “Raise your hand” function to ask a question (or put it in the chat).

Mute yourself—keep muted unless you are asking a question.

Keep the conversation going! Post your work or questions in the forum.

Questions at designated times—save most questions for the Q&A portions.

Be active in the chat—share relevant insights and help answer others’ questions when possible.

Use the chat for technical issues—report technical problems in the chat, not verbally.

Fill out the feedback survey—your input helps us improve future workshops.

Tag me in the appropriate channels for feedback. Please don’t DM me. (I won’t answer.)

Skills Matrix alignment

Design	Project Management	Scripting	Art	Operations
Mechanics The main interactions, rules, procedures that a player uses / interacts with (that are fun / delightful / useful) via items, interactions, UI, etc.	Product Management The frameworks for turning ideas into practical, executable projects with clear goals, timelines, and deliverables	Programming  The skills needed to write and manage (3D content) codebases.	Assets  The design and creation of static meshes for use as world environments or items / props / wearables / characters (including meshes and textures).	Marketing The tools for acquiring and managing an audience.
Core Loop The creation of meaning / accomplishment / feedback when repeatedly using the (main) mechanics.	Content Development The processes to ensure an idea is clear and “proven” before moving to the long stage of polished script and art creation.	Meta Horizon Systems  The use of Meta Horizon’s specific technical features and capabilities.	Dynamics The creation and application of elements that bring life to static art (such as animations, visual effects, lighting, sound effects, and music).	Business Management The administration of team / financial management, including payments, legal affairs, and related human resources functions (including managing partnerships and talent).
Progression The frameworks that allow players to accrue long-term value and retain in a world (achievements, identify, items, etc.).

Q&A

Noesis in Action: Under the Hood

MKE_TheGuru

Tellous

Shards632

GausRoth

Simple Mod Tool

Dynamic Lists

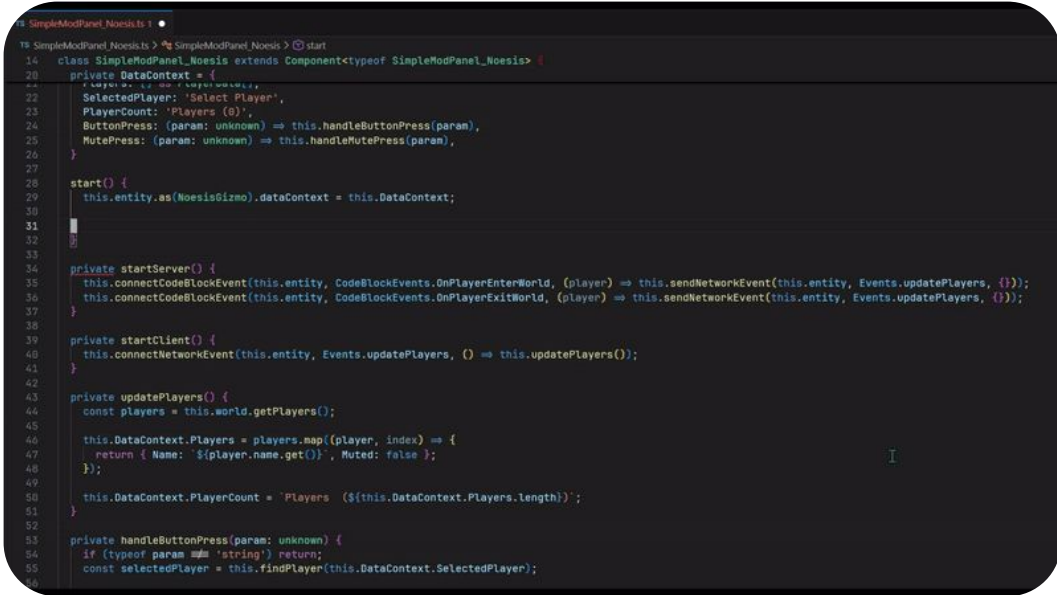

- Use ListBox to render an array of elements
 - Selecting item updates the data context
 - Get player reference from in-world array

Server/Client Communication

- Leverage ‘Shared’ execution mode to get server side events
 - Send to local user through entity
 - Update local data

‘Moderating’ some rowdy NPCs in the world

Connecting the script to the server and client

Noesis in Action: Under the Hood

Shards632

GausRoth

Animated Countdown UI

Interactivity

Property Change Trigger

- View Model Binding
 - CountdownValue: Number
 - IsVisible: Boolean
- Comparison Condition
 - Not Equals 0: Show “Go!”
 - Equals 0: Show Number
- Play Storyboard Action

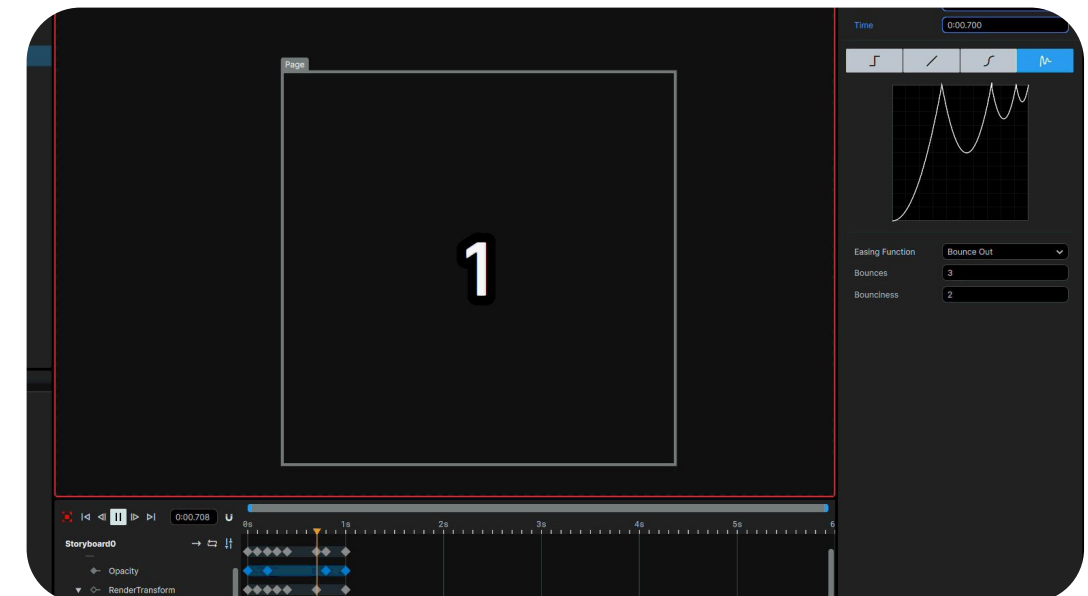

Animations

Storyboards

- Opacity
- Render Transform to adjust Scale and Rotation
- Easing functions

Noesis animated countdown in Meta Horizon Worlds

Viewing the bounce easing function in Noesis Studio

MKE_TheGuru

Tellous

Shards632

GausRoth

Color Picker

Interactivity

- PropertyChangeTrigger
- EventTrigger
 - MouseDown
 - MouseMove
 - MouseUp
- Button

Widgets

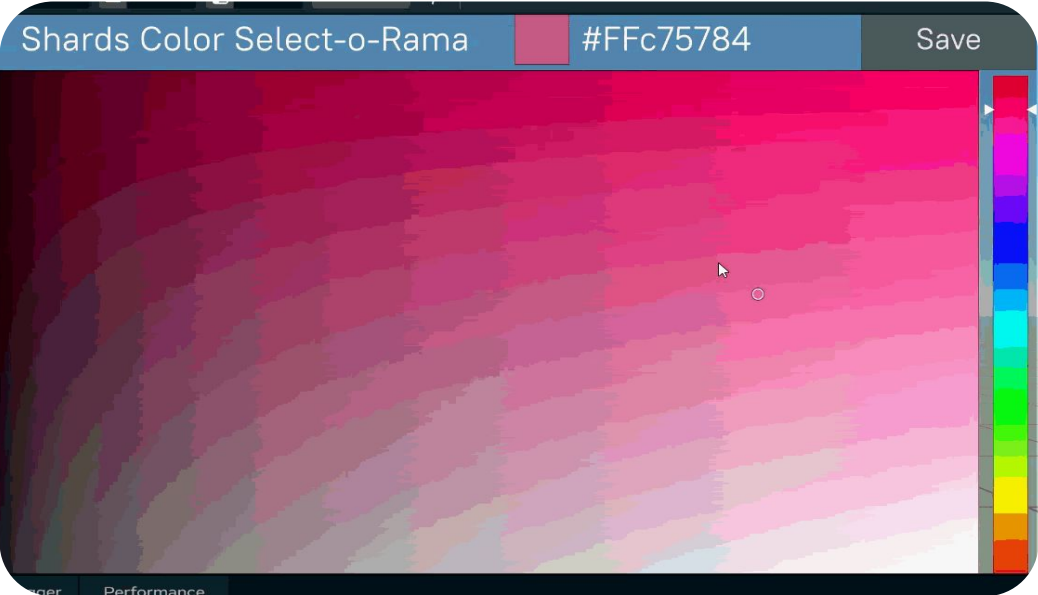

- Slider
 - Built in thumb and track
- Canvas
 - No layout of children

Templates

- Slider Track
- Slider Thumb

RenderTransform

- Move picker target to track mouse

Color Picker using Hue slider and Saturation/Value mouse position

```
export class ColorPickerGizmo extends Component<typeof ColorPickerGizmo> {
  private dataContext = {
    colorSwatch: {
      Color: "#FFFFFFAF0",
    },
    hueSlider: 0.5,
    pickerX: 0,
    pickerY: 0,
    events: {
      onSVClick: this.onSVClick.bind(this),
      onSVMove: this.onSVMove.bind(this),
      onSVRelease: this.onSVRelease.bind(this),
      onHueChange: this.onHueChange.bind(this),
      onSave: this.onSave.bind(this),
    },
    hueColor: {
      Color: "#FFFF0000",
    },
  };
  private isAdjustingSV = false;
  private hue = 0;
  private saturation = 0;
  private value = 0;
```

Noesis Typescript data context and state

Noesis in Action: Under the Hood

MKE_TheGuru

Tellous

Shards632

GausRoth

Per Player Audio Settings & Manager

Elements:

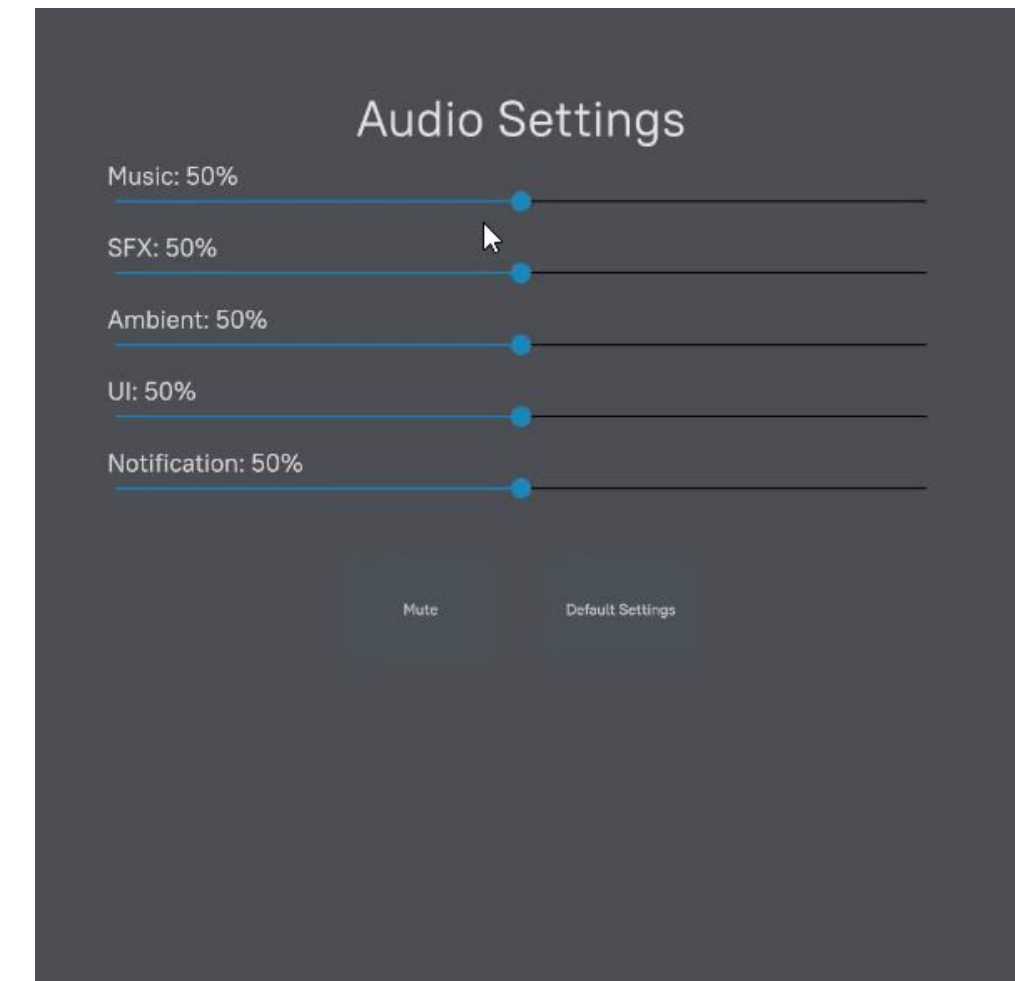

- Grid
- StackPanel
- TextBlock
- Slider
- Button

Interactivity:

- **Event Triggers**
 - **ValueChanged**
 - **LostMouseCapture**
 - **LostTouchCapture**
- **InvokeCommand**

Data & Use:

A PPV JSON Object is used to store the audio setting values. An Audio Manager script handles playing all audio for a single player using their PPV values.

Setting personal audio settings.

Q&A

Thank

You!

Thank you for learning with us!
